***Claim Rejections - 35 USC § 112***

Claims 28-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to disclose how the invention would work with more than one sensing coil. Column 7, lines 35-37 disclose that the unknowns may be determined using one coil and five magnetic fields, two coils and three magnetic fields or three coils and two magnetic fields. The specification only provides how this would be accomplished with one coil by disclosing all of the necessary steps needed to acquire the position and orientation data. Given the information provided, one skilled in the art would not know how to acquire the position and orientation data if more than one sensing coil were to be used.

***Allowable Subject Matter***

Claims 1-22 are allowable over the prior art of record.
